

HOW TO PLAY

RAPID ROULETTE

Enjoy the excitement of our live Roulette game at the comfort of your own Rapid Roulette terminal.

HOW TO PLAY

The Rapid Roulette terminal accepts New Zealand currency notes and slot machine tickets.

You may begin betting once 'place your bets' is displayed on the screen. Simply nominate the value of your chips and touch the preferred betting area (once to play one chip, twice to play two chips).

When the ball is about to drop, the screen will then show 'no more bets'. At this point the game will lock and you will be unable to place or remove wagers. Part of the screen display will change to a live video display. Once the ball has dropped and the winning number is highlighted, winning bets will be paid.

You can then choose to repeat the same bet. To finish the game simply press the 'collect' button and you will receive a pay-out ticket. This can be cashed or utilised in another terminal or slot machine.

A camera positioned above the Roulette wheel transmits the live action to your terminal.

ODDS & PAYOUT

Rapid Roulette pays the same odds as any other Roulette table. If zero or double zero is the winning number, all outside bets lose.
